Open Shelving

• Perfect for storage of supplies, tools, bins, equipment, gear, products, canisters, boxed, etc.

Shelves are box formed at front and back allowing high capacity storage with minimal deflection. Sides of shelves are triple flanged adding to shelf strength. Compression shelf clips improve overall unit capacity. Posts are punched to allow shelves to be adjusted top to bottom at 1-1/2" on center. Beaded front posts allow use of full shelf width and are common between adjoining units reducing assembly and installation time as well as reducing cost. Angle back posts can be bolted together when joining units side-by-side or back-to-back. Side and back sway braces eliminate unit sway providing a safe storage solution. FOB Shipping Point.

Starter Units Include: Two front beaded posts, two angle back posts, one pair of back sway braces, two pair of side sway braces and shelves with shelf clips applicable to unit ordered.

Adder Units Include: One front beaded post, two angle back posts, one pair of back sway braces, one pair of side sway braces and shelves with shelf clips applicable to unit ordered.

- **Space Plus USA's Boltless Rivet Shelving has been designed for handling larger volume items both efficiently and economically.**
- **Sections can be as large as 96" wide minimizing the number of post obstructions and accommodating an array of load sizes within the same unit.**
- **Depth can be as great as 48" and since there are no side or back braces, sections can be easily be accessed from all directions.**
- **Sections 72", 60" or 48" long, require one Center Support per level.**
- **Sections 96" long require two Center Supports per level.**
- **Beige in color.**

- For higher density applications, Space plus USA's Single Rivet Shelving offers a more efficient use of storage space.

Wire Shelving

- **Versatile construction.**
- **Fast, secure assembly.**

The open wire design of these carbon-steel shelves minimizes dust accumulation and allows a free circulation of air, greater visibility of stored items and greater light penetration. Wire shelving can change as quickly as your needs. Posts have grooves at 1" intervals. A tapered split sleeve snaps together around each post. Tapered openings in the shelf corners slide over the tapered split sleeves providing a positive lock. Shelf is assembled in minutes without the use of any special tools. Shelf wires run front to back, allowing you to slide items on and off shelves smoothly. Unit comes complete with 4 shelves. Shelves are accessible from all sides making maximum use of storage space. Bolt levelers compensate for uneven surfaces on stationary posts. Posts also available for mobile posts. Call for details. Choose from Chrome, Green Epoxy or Powder Coat Black finish. Hi-Cap Rubber Mold-On/Cast Iron Wheels

- **Higher load capacity of standard rubber mold-on wheels with semi-steel centers.**

Features long service with true abrasion resistance. Made of 90 Durometer hard rubber tread. They start easier with heavy loads with less effort to keep them rolling, while the harder tread reduces heat build-up. Harder surface also reduces embedding of foreign materials from floors. Semi-steel wheel centers with fitting for pressure lubrication. FOB Shipping Point.

Easy Lift Equipment

EasyLift Drum Transporters

• Easy Lift Equipment Drum Transporters are the safe and ergonomic solution for picking and transporting drums from the floor or a pallet.

Easy Lift Equipment has developed an extensive line of ergonomic drum transporters since our original model was awarded a US patent in 1997. Designed for virtually maintenance-free operation our drum transporters help eliminate the risk of injuries caused by manhandling drums. All models are available with both intrinsically or non-intrinsically safe scales; for quickly and accurately weighing drums without the need for floor scales. The EG1 and EG2L clamping heads are designed to handle a chimed plastic, steel, or fiber drum. All models are available with 20" of lift, with optional taller masts for double or triple stacking. Standard models are steel construction with safety yellow powder coating for durability. Optional FDA approved "metallic gray" powder coating as well as full 304 stainless steel construction are also available for food and pharmaceutical applications. FOB Shipping Point.

Aerosolv® Counter makes it easy to count and record the number of aerosol cans punctured.

RCRA regulations require that, unless relieved of pressure, aerosol cans must be packed in a drum and manifested for solid hazardous waste disposal. With Aerosolv®, cans are not solid hazardous waste, but are fully recyclable. Residual liquids, released by Aerosolv® and collected in a drum, may be eligible for reclamation or recycling through a waste handler, resulting in waste minimization credits. 55 gallon drum will collect the contents of over 4000 spent aerosols. Easily operated by hand. With the press of the handle, puncture pin pierces the can – leaves no sharp edges or crushed metal. Made of aircraft aluminum, requiring no maintenance. Filter comprises a coalescing lower portion, which removes airborne organic compounds and an activated carbon upper portion which absorbs odor. FOB Shipping Point.

Counter Balanced Floor Cranes

- **Hand pump or 12V DC powered.**
- **Welded steel construction.**
- **Counterbalance included.**

This crane has an adjustable boom to allow for maximum adjustments and versatility to lift a variety of loads. The boom is raised with a manual hydraulic hand pump or a push of a bottom on DC powered units. The boom also telescopes out for a greater reach. The counterbalance design eliminates the need for front legs, making the unit easier to maneuver and ideal for reaching tight, hard to reach areas. Units roll on two (2) rigid 8" x 2" glass-filled nylon and two (2) swivel 8" x 3" phenolic casters with side brake. FOB Shipping Point.

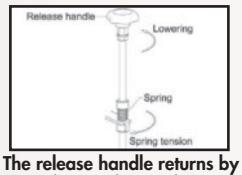
Hydraulic/Foot Operated Stackers

- **Useful in transporting pallets between narrow spaces and walkways.**
- **Swivel handling with creatively designed plated handles.**
- **Load capacity up to 1322 lbs.**

Easy to operate in entrances and exits and in buildings with low ceilings. The rigid casters have urethane wheels, and the swivel casters have rubber wheels with brakes on both sides. Strong and light-weight mast and fork design uses tensile strength steel. Fork width is easy to adjust and the new structure of the mast prevents fork vibration. Comes with an overloading prevention valve. Equipped with a rapid traverse device (attached to the HH200). Equipped with a springback mechanism in the release handle. In an emergency, lowering will stop as soon as you release the handle. Close the release handle when raising the lift. The pump pedal is designed to be easy to press. FOB Shipping Point.



The release handle returns by spring tension, so in an emergency, the fork will stop lowering as soon as you release the handle.

Compact hydraulic step lifter is easy to operate in narrow walkways.

PERMANENT LIFT MAGNETS

LIFT MAGNET GUIDELINES:

Surface Condition: Magnet face and load surface must be clean and smooth. Capacity ratings listed are on flat, clean and polished steel plate with magnet face in full contact with the load surface. Paint, coatings, scale or other materials between the load surface and the magnet will adversely affect the holding power of the magnet.

Material Thickness: Lifting capacity is lower on thinner materials. Contact dealer for more capacity information.

Material Composition: Magnet capacity is based on lifting low carbon steel. Other materials may reduce lifting capacity.

Load Size and Position: Thin sheets, rough and irregular surfaces, odd shapes and scale all affect holding power adversely and must be considered in establishing a safety factor. The magnet must be positioned on the load center of gravity. Tilted or unbalanced loads significantly affect the holding power of the magnet.

Capacity: Maximum attractive force is approximately twice the rated lifting capacity. Capacity ratings listed are on flat, clean and polished steel plate with magnet face in full contact with the load surface. The above factors should be taken into account when determining appropriated safety factors for a given load. A minimum of 3 to 1 safety factor must be applied based on the actual breakaway force for a given load. **Refer to ASME Standard B30.20 for inspection and operating procedures of Close Proximity Operated Lifting Magnets and read Manufacturers' Operating Manual before using magnet.**

Lifting WEBBING SLINGS

- **Premium edge sling at a standard edge sling cost.**
- **These strong webbing slings ensure worry-free lifting of heavy loads. Polyester standard. Nylon available - call for pricing.**
- **Extremely strong and wear-resistant, yet soft enough to handle even delicate surfaces.**

PRO EDGE® Tougher. Stronger. Better.®

Pro-Edge® is 50% tougher than standard webbing. The edges are made with high tenacity twisted tire-cord yarns. It is a scientific fact that twisted yarns are more resistant to cutting and abrasion than untwisted yarns. Since these twists are part of the yarn construction, the cut and abrasion resistance properties of the yarn will not go away after standard wear. Pro-Edge® maintains its strength far longer than most other webbings. Polyester standard. Nylon available -- call for pricing. All slings are measured end to end including eyes and/or hardware. JET JLH Series Lever Hoist

- **Dual pawl design.**

All JLH-Series Lever Hoists come with slip clutch style overload protection that prevents lifting or pulling damaging loads beyond the rated capacity of the hoist and when triggered, the overload protection can be reset on site. JET's improved easy free chain design is a two-step, no load, free chaining system. The system permits quicker hoist positioning and take up of slack chain. And it is engineered not to free chain under load. The advanced offset handle design allows for extra clearance between the operator's hand and the load chain. The lightweight design with shorter handle and smaller body are ideal for confined areas and low headroom applications. Grade 100, corrosive resistant plated load chain is a smaller, more compact link that is 20% stronger than Grade 80 load chain. FOB Shipping Point.

Rail Boards

Bluff Rail Boards are a way to bridge the gap between a dock and railcar for safe loading and unloading of shipments. They are custom designed to meet the unique specifications of each dock site, and can work successfully with any type of railcar. Lifting loops and locking rings make the Rail Board easy to place and secure before driving across it with a forklift. Available capacities range from 15,000-90,000 lbs. All-welded steel construction. Worksheet required to design - - call for pricing. Manufacturing time 10-12 working days. FOB Shipping Point.

Edge of Dock Levelers

Bluff's Edge of Dock Leveler provides an easy way to correct the height difference between a dock and trailer bed. When released, the handle automatically returns to its stored position. Conforms to ANSI MH30.1 Standards. Manufacturing lead time 7 working days. FOB Shipping Point.

Edge of Dock Leveler Features

- **Capacities from 20,000 to 30,000 lbs.**

Warning Lights

Collision Awareness products are designed to detect both pedestrian and forklift traffic and alert all parties to the danger that exists just around the corner. 40% of all forklift fatalities are caused by an individual being struck or run over by a forklift. Many of these accidents and fatalities can be avoided by warning pedestrians and operators of approaching danger. The LOOK OUT sensor alert warning system allows for quick and easy recognition of potentially dangerous situations. Why take chances when you can avoid accidents and protect your employees?

Consider The Basics

Detect on one side, alert on the other side – 6 models available. Alert forklift operators and individuals of potentially dangerous traffic coming through openings. Unit incudes mounting hardware and can be installed in minutes. FOB Shipping Point.

Units include mounting hardware and can be installed in minutes. FOB Shipping Point.

GRITSHIELD™ models add extra traction to tiles.

564, 566 ErgoDeck® General Purpose is designed for medium-duty work environments and features the best surface for work areas with foot and light cart traffic. The softer compound compresses more underfoot, delivering enhanced fatigue relief, while the box spring underside provides the necessary structure for rolling carts.

590 ErgoDeck® Diamond-Plate features the Heavy Duty and General Purpose tile rolled into one. The box-spring foundation compresses under foot providing anti-fatigue benefits and the necessary structure for rolling carts. The All-Star Diamond-Plate surface pattern provides traction and gives you the industrial look and facility needs.

Choose the surface pattern, compound and color that suits your unique needs. Replace single tiles or sections as the work need changes. FOB Shipping Point.

Lateral Files

HLPL3672L60

Heavy gauge welded steel construction ensures rigidity and durability for many years of use. Files will accommodate letter or legal hanging files. A mechanical interlock system prevents more than one drawer from opening at a time to eliminate the danger of tipping. Drawers and shelves glide on heavy duty, full extension ball bearing suspensions. A single lock controls all openings. Locks are core removable and master keyed (order keys separately). Each opening is equipped with side-to-side hang rods for the folders. Optional front-to-back rods (H15CR) are available.

Drawers and doors have easy grip, full-width pulls with recessed label holders. Four leveling glides allow the unit to be leveled on uneven floors. To reduce risk of tipping, order two drawer lateral files with counterweights (suffix "W") for all applications except under a work surface in a workstation. Five and six-high units have retractable door(s) with roll-out drawer on top opening(s). Choose an optional laminate top to create a work surface on two and three-high files. Specify Oak or Walnut. Rolls on four 4" swivel casters. The All Directional caster design provides 360° turning radius. Comes standard with solid steel steps with abrasive Non-Slip mats (other treads styles available). Durable Gray powder coat finish. Available to be boxed -- call for more information. FOB Shipping Point.
